

PhD²ays

December 9 - 11, 2020

PhD²ays is a series of events aiming to open a window on the world of PhD. It is addressed mainly to **undergraduate and graduate students** to discover the advanced research in mathematics, and also to PhD students to see what their colleagues are working on.

PhD²ays 2020 will take place as a **virtual conference**

- Zoom link: <https://us02web.zoom.us/j/82044279361>.
- Abstracts & more info: <https://phd2ays.bubbleapps.io>.

Participation is free.

DOTTORATO IN SCIENZE MATEMATICHE

Coordinatore: Prof. Vieri Mastropietro E-mail: vieri.mastropietro@unimi.it

PhD²ays

Wednesday, December 9, 2020

- 15:00 **FILIPA VALDEIRA** Learning from 3D data: how mathematics can create a realistic human face
- 15:50 **BEATRICE LANGELLA** Periodic Schrödinger operators: a normal form approach
- 16:40 **FRANCESCA GUFFANTI** Categorical logic: an introduction to doctrines
- 17:30 **RICCARDO ZUFFETTI** Cones of orthogonal Shimura subvarieties

Thursday, December 10, 2020

- 15:00 **YANYAN GUO** A coupled elliptic system of equations in different dimensions
- 15:50 **ALESSANDRO GIANOLA** Automated reasoning or: how mathematicians will learn to stop worrying and love computers
- 16:40 **ALESSANDRO DOLDI** Entropy martingale optimal transport

Friday, December 11, 2020

- 15:00 **SIMONE NOVARIO** Linear systems on IHS varieties: an introduction
- 15:50 **EMMANUEL ZONGO** Nonlinear eigenvalue problems and application to bifurcation for quasi-linear operators
- 16:40 **FEDERICO GIROTTI** Quantum channels: recurrence, transience and enclosures
