Guide for Replication of

Franchino, F. *'Challenges to liberal intergovernmentalism'*, European Union Politics

There are two files for replication:

The STATA data file: ams_jbs_temp.dta

The STATA do file: replication.do

The replication exercise is based on ams_jbs_temp.dta.

This data file is the one ready for being used by Slapin's do file probit_indiff_103006.do.

For further details, please refer the replication data available from Slapin, Jonathan B. "Bargaining Power at Europe's Intergovernmental Conferences: Testing Institutional and Intergovernmental Theories." *International Organization* 62, no. 01 (2008): 131–162.

For replication, instead of running Slapin's probit_indiff_103006.do, run my file replication.do.

This do file contains a step by step explanation of the commands. I also make clear where commands are the same as Slapin's do file probit_indiff_103006.do, and where they differ.
